

POGO

SEATING EXCELLENCE AT WORK

Sweeping armrests continue up and down the back as well as into the front seat. Like a ribbon twirling continuously back and forth. In addition to just looking good, this sinuous form is designed to flex substantially, giving Pogo freedom to rock and recline without complicated mechanisms. Surface texture on the front contrasts well with the smooth glossy back and provides seating grip and resists scratches. A shiny aluminium lever completes a classy finish.

433D NA A40 N3

Pogo's sophisticated shape and vivid colours will be welcomed by anyone who demands more identity and individuality than the usual run of office furniture. Pogo fits right in casual work environments and front-end applications such as showrooms, fashion boutiques, and service counters.

Shell is injection-moulded of polypropylene in 12 colour choices. Height adjustment is controlled via a diecast aluminium lever in polished finish. Seat and back pads are constructed using polypropylene internal shells upholstered with fabric or PU/PVC covering. Seat and back pads may be replacable on site. The 64cm diameter base is injection-moulded of polypropylene in black, and is equipped with black nylon hooded castors.
